Henley High School
School Device Program

Supporting Learning Through Technology

Henley High School places a strong emphasis on the development of students' Information and Communication Technology (ICT) literacy. Technology is an important tool that supports effective teaching and learning and is embedded across the school curriculum.

The school has made significant investment in its technology infrastructure to ensure students have reliable access to the digital tools and resources required to support their learning. To provide a consistent and reliable learning environment, Henley High School has identified a recommended laptop that meets the requirements of both students and staff.

IMPORTANT – to ensure compatibility, security and reliable access to the school's systems and network, all students are required to use a laptop purchased through the Henley High School Laptop Portal as their primary learning device. **Students are not permitted to bring or use personally purchased laptops or other devices from home as their school learning device.**

LAPTOP PURCHASE

Henley High School has undertaken extensive research to identify a device that is suitable for the demands of secondary education and the school's technology environment. Purchasing the recommended Henley High School device provides students and families with the following benefits:

- Access to essential software applications, including Microsoft Office 365 and Adobe Creative Cloud.
- A three-year manufacturer's warranty.
- Onsite device management and technical support through the school's IT Services team.
- Battery capacity designed to support a full school day.
- Intelligent battery management technology designed to improve battery efficiency and extend battery lifespan through smart charging and real-time power management.
- Sufficient memory to allow students to run multiple applications simultaneously.
- Access to a 'hot swap' loan device where a laptop requires offsite repair, minimising disruption to learning.
- A device configured and optimised for use within the Henley High School environment.
- Access to the school's wireless network and technology infrastructure.
- Accidental Damage Protection for the applicable warranty period.
- Access to a dedicated Henley High School laptop purchasing portal.

YEAR 7 STUDENTS

Two Laptops Over Six Years. As part of the Henley High School Device Program, Year 7 students have the option to purchase two Henley High School laptops over their six years of secondary schooling.
Year 7 - A new Henley High School laptop is purchased at the beginning of Year 7.
Year 10 - Families have the option to purchase a new Henley High School laptop at the beginning of Year 10.

Replacing the device in Year 10 ensures students have a current and reliable device as they enter the senior years of their schooling, when technology becomes increasingly important to learning.

Henley High School strongly recommends the purchase of a second device in Year 10. The maximum available manufacturer's warranty is three years. Following the warranty period, support for the device may be limited, including the availability of replacement parts, and the Accidental Damage Protection will no longer apply.

NEW YEAR 8–12 STUDENTS

Students entering Henley High School in **Years 8–12** will be required to purchase a new Henley High School recommended device when they commence at the school. This ensures students have a device that is compatible with the school's systems, network and learning environment and allows them to access the same technology and software as their peers.

DAILY BORROWING OPTION

Families who choose not to purchase a laptop may access the no-cost daily device borrowing option.
Devices borrowed under this arrangement:

- Must be collected and returned each school day.
- Cannot be taken home by students.

This may have a significant impact on learning, particularly during the senior years (Years 10–12), when students are increasingly expected to access and complete learning tasks independently outside of school hours.
Parents/caregivers are liable for any damage to daily loan devices in accordance with the signed device borrowing agreement.

YEAR 12 STUDENTS

Year 12 students who require a new laptop but do not wish to purchase a device may enter into a one-year laptop lease arrangement. The cost of the lease is a $200 non-refundable payment. The leased laptop must be returned to Henley High School in good working order before the student leaves the school.

If the laptop is not returned or is returned in a condition where it is deemed irreparable, the family will be invoiced for the full replacement cost of the device.

COST OF LAPTOPS

Due to the increase in Data Centres, there is a world shortage of internal components, which is having a significant impact on laptop costs globally.

MODEL - Lenovo ThinkPad E14 Intel Core 5 320 16GB 256GB Touch
Cost - $1970.10 inc GST (subject to change on a monthly basis)

Screen size: 14" WUXGA (1920 x 1200), IPS, Anti-Glare, Touch Display
Processor: Intel Core 5 320
Memory: 16GB
Storage: 256GB
Graphics: Integrated Graphics
Operating System: Windows 11 Pro Education
Camera: 1080P Full HD IR Camera (Windows Hello) with Privacy Shutter
Weight: 1.41 kg
Battery life: Up to 16 hours

Payment plan available through Zip Pay
If you are a low income earner, you may be eligible for School Card and/or a free laptop. Please contact Paula Sandford (Business Leader via email Paula.Sandford@henleyhs.sa.edu.au

SCHOOL LEAVER POLICY

If a student leaves Henley High School within the first six months of purchasing a laptop, the school may consider purchasing the device back from the family, provided the laptop is in good working order.

When a student leaves Henley High School, access to school-provided software and services will be deactivated within approximately 30–60 days. This occurs because the student will no longer meet the school's licensing and access requirements.

Families who choose to retain the laptop are encouraged to bring the device to the IT Services Helpdesk before the student leaves the school. IT Services can reimage the device to remove school-specific software, settings and management and return it to basic factory settings.

INSURANCE

Families are encouraged to contact their insurance provider to discuss appropriate insurance coverage for the laptop.
We recommend that families consider adding the device to their household insurance policy to ensure appropriate coverage in circumstances such as theft, fire or other insured events.

Families should check the specific terms, conditions, exclusions and excess applicable to their policy.

WARRANTY

The laptop is covered by a three-year manufacturer's warranty, which covers eligible hardware failures.
Henley High School IT Services will assess and oversee warranty claims and work with the device provider to coordinate the repair process.

Where a device requires offsite repair, the school will provide a loan device ('hot swap') where available to minimise disruption to the student's learning.

ACCIDENTAL DAMAGE

Students and families are encouraged to take appropriate care of the laptop at all times. Parents/caregivers are encouraged to discuss with their child the importance of responsible handling, transportation and storage of the device.
Each purchased device includes Accidental Damage Protection for the applicable warranty period.

If a laptop is damaged as a result of student negligence or inappropriate use, the family may be required to contribute to or cover the cost of repair or replacement. In cases of severe damage, the family may be required to purchase a replacement Henley High School laptop.
